We've Got Your Back!

Advantage Software's unrivaled Anytime Support™ is included standard with *every* version of Eclipse. Whether you're taking a deposition on the other side of the world, captioning a football game on Christmas Eve, or simply learning student software, we've got your back. Every hour of every day. Murphy never takes a day off - and neither do our friendly technicians.

We Make the Hard Stuff Easy

Eclipse constantly works behind the scenes to reduce your workload. Word Cloud™ AI takes conflict resolution to the next level by looking at the meaning of words in the context of the entire transcript. Portable Proofreading lets you proofread your work anytime, anywhere, on any device. And a robust Transcript Management Suite simplifies transcript production from beginning to delivery.

Fully Integrated for Maximum Performance

Eclipse was meticulously designed from the ground up as a fully-integrated program where virtually every function enhances every other function. Intelligent Word Cloud™ conflict resolution enhances Translation Magic, which enhances Auto-Brief, which enhances Team Editing, which learns from others' editing changes, which improves intelligent conflict resolution, which results in less editing. That's why cobbled-on copycat features from other vendors never deliver the ease of use and efficiency of Eclipse.

> *I'm using a team of scopists in my realtime, daily copy trial, delivering finals in less than an hour – my best delivery times ever. They all get into my files in the Cloud as soon as I log on and stay in the whole time. Their globals go directly to my job dictionary for perfect-looking realtime. We are outputting to Bridge Mobile in realtime, and it's all working flawlessly. I am writing 350 pages a day and going home by 6:00 so I can relax with my family, and go into court fresh the very next day. We are totally loving it!*

(772) 288-3266 ◆ (800) 800-1759

Work Smarter, Not Harder

With over 375 new features and improvements for 2021, Eclipse continues to lead the way in reporting technology - so you can work less and finish faster.

ECLIPSE 10

Eclipse 10 reflects our continuing commitment to fine-tuning, augmenting, and refining our products based upon your feedback.
AI Boost for More Accurate Results

Unusual names and terms are a challenge for even the best reporters. Is "entheogenic" or "Akbar Gbajabiamila" in your dictionary? Fortunately, Eclipse has you covered. Using a powerful online speech-to-text engine, the new AI Boost option can intelligently compare your steno translations with text created from your audiosynch recording. Result: context-based edits for the most accurate results ever!

(Yellow highlighted text added by AI Boost)

Free Connectify Hotspot Integration for Easy Realtime Connections

Connecting with clients locally or worldwide has never been easier thanks to fully-integrated Connectify Hotspot software, included free with Version 10. Take your realtime to the next level with Bridge Mobile (subscription required).

Opus Audio Support

Opus audio support gives you crystal clear audio at a reduced bandwidth, saving space and improving the efficiency of our industry-leading Team Editing™.

Dynamic Automatic Indexing

Now you can make changes to your document even after creating an automatic index, and the page/line numbers in the index will automatically adjust.

And That's Only the Beginning...

Other new features include one-click Bridge Mobile email links, customizable international characters, multi-channel audio device support, WPM dynamics analysis, Proofreader improvements, a dashboard warning light system, touch-screen support, confidence tracking, individual-steno-key error analysis - and much more. With updates this massive, we can only scratch the surface here of what puts Eclipse in a class by itself. But when you hear about "amazing new features" elsewhere, chances are they've been in Eclipse for years. But ask us about them anyway. If we're missing something, we'll add it for you. Fast. And we'll make it better. Because we *love* to amaze our customers.
