ADVANTAGE SOFTWARE

Globally recognized as the world's leading transcript production software, Eclipse by Advantage Software has earned the trust of thousands of reporters worldwide. Now Eclipse RSR brings the unmatched power of Eclipse to digital reporting, dramatically increasing throughput.

INSTANT EDITABLE REALTIME

With Eclipse RSR, skilled digital reporters can deliver high-quality realtime text to judges, attorneys, and litigants. Equipped with a meticulously crafted set of Hyperkey commands, reporters can consolidate keystrokes and expedite editing time. Moreover, the innovative Team Editing™ feature enables multiple professionals to edit the same file simultaneously in realtime, while discreetly concealing reporter notes and annotations.
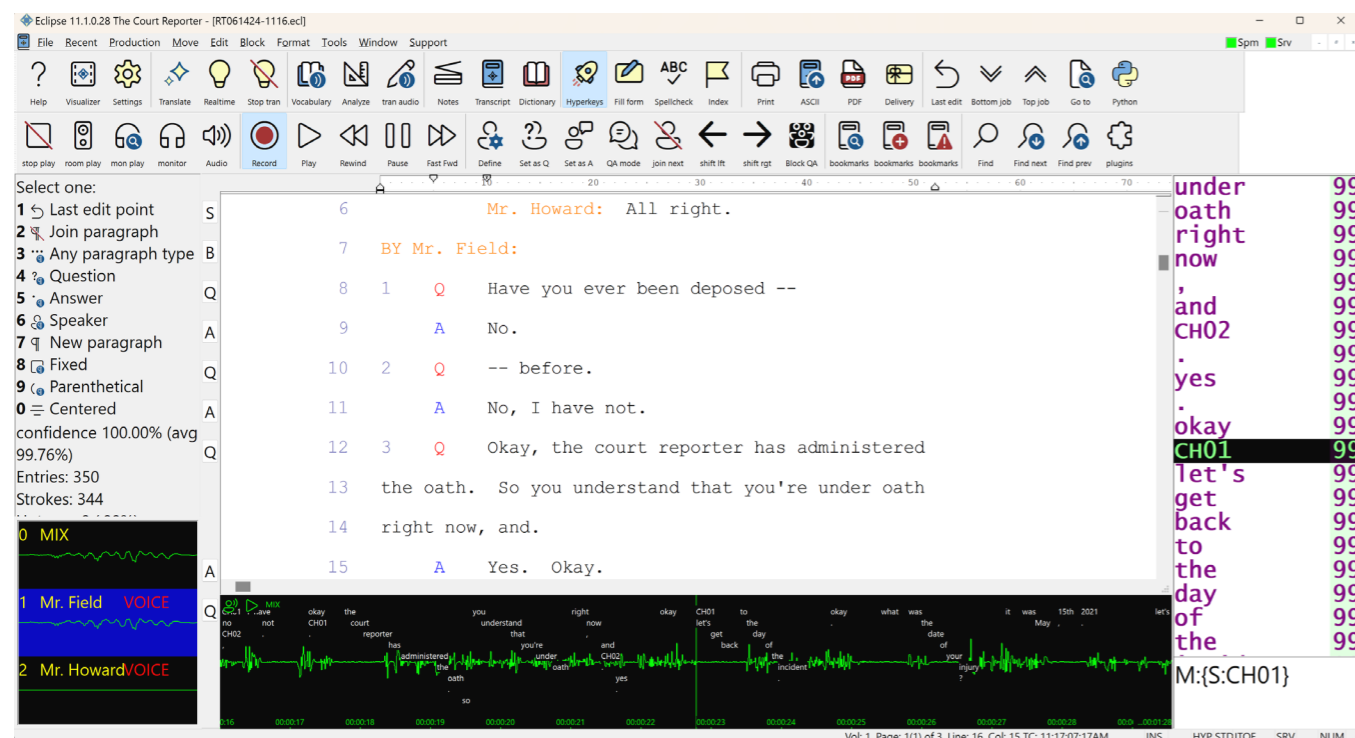

NO INTERNET REQUIRED

Eclipse RSR uses Speechmatics, the most real-world accurate ASR ever developed. Speech recognition errors are reduced across noisy backgrounds, accents, dialects, and other sociodemographic factors. Enjoy flexible deployment options, even locally on your laptop, for seamless performance without connectivity delays. Anywhere, anytime, Eclipse RSR delivers unparalleled accuracy.

TAILORED SOLUTIONS FOR YOUR UNIQUE NEEDS

Leveraging a wealth of specialized algorithms, artificial intelligence, and an extensive array of editing features and user-definable options, we engineered Eclipse RSR to improve and expedite the transcript production process. Our solution is also inherently adaptable. Be sure to inquire about our latest advancements in customization options to tailor Eclipse RSR to your distinct needs.

CONNECT AND COLLABORATE LIKE NEVER BEFORE

Eclipse RSR is compatible with all Advantage Software products, unlocking access to a vast community of transcript production experts and fostering Team Editing™ collaboration. With fully-integrated Connectify Hotspot software and Bridge trial-viewing software, connecting with clients locally or globally has never been simpler.
